Cowboy Bebop Microsite Initial Build

- Colors are great
- Make pictures or add pictures going all the way down
- For Copy: make sure to differentiate between sections and remove wikipedia citations
  - Make h3 have more distinction
- Navigation: make page names fill out the space at the top
- Great display typeface choice
- Blend image with homepage picture: #130C0B
- Can definitely cut down on the copy
- Footer
  - Our names
  - Link to Wikipedia article
  - Link to Cowboy Bebop theme song
- Keep images when responsive please
  - Use display:none for images at larger sizes
    - Then display at smaller sizes, integrated into copy or below (i think this is how it works, don't hold me to it lol)
- Hamburger, yum
